Prepared By: Jason Frost

MealCube Framework Licence • The current administrative structure now in use at The Saanich Keg • Training for data-entry and framework management • Administrative permissions granted to Keg	$8,000
Custom Work - Non Touch Screen MealCube System • A version of the MealCube system will be created such that mainstream computers can easily access all MealCube modules.	Included With Framework
MealCube Maintanence • Continual updates to software framework and data • Framework maintenance to match Keg's preferences • Repairs of bugs and tweaks to system as per Keg direction • Technical support to head office admin as well as individual stores	$500/month
Custom Work - Creation of "Keg Portal" • Access to all Keg management will allow them to see MealCube functions as well as back-of-house management communications similar in content to Keg's current version with a much improved interface	As per quote
Custom Work - Creation of "Procedures Module" • System will mirror MealCube, including photos and video to communicate kitchen and fixed asset procedures to restaurant staff • A database will be utilized to allow Keg HO to monitor the progress and condition of all stores' equipment	As per quote
Custom Work - Creation of "Bar Module" • Will be integrated into the current MealCube application and be available to all bar staff for recipes and procedures • Can be updated with new tent card features several times per year and pushed to all outlets	As per quote
Custom Work - Creation of "HR Module" • Will mirror current MealCube and include all staff training material including instructional photos and videos • Management QWLs may also be completed through this portal	As per quote

The addition of future modules to the in-kitchen MealCube, portal, procedures module, or any other functionality, can be integrated and customized at any time.
